RE: 17th Street and 25th East (Hitt Road) Intersection Improvement Project

Dear Property Owner/Occupant:

The City of Idaho Falls Public Works Department would like to invite you to a public meeting regarding the 17th Street and 25th East (Hitt Road) Intersection Improvement project on Wednesday, November 16, 2016 from 4:30-6:30 p.m. The meeting will be held in the cafeteria at Eastern Idaho Technical College (EITC). Short project presentations will be given on the hour at 5 and 6 p.m. Displays will be set up, and the design team will be available to discuss the project and answer questions.

The project, jointly sponsored by the City of Idaho Falls and the City of Ammon, includes widening of the 17th Street/25th East intersection to add a second left-turn lane on all four approaches and dedicated right-turn lanes on the northbound, southbound, and eastbound approaches. Median improvements will also be constructed on 25th East between 17th Street and 25th Street and on 17th Street between Ashment Avenue and 25th East. The entire existing roadway surface will be milled and a new asphalt overlay constructed throughout the project area. Design activities are scheduled to be complete in December, with construction anticipated to begin in early spring 2017.

In addition to the work jointly sponsored and funded by the two cities, the City of Idaho Falls will fund the extension of the milling and overlay work on 17th Street westward to Woodruff Avenue.

Additional information is available on the City of Idaho Falls website at www.idahofallsidaho.gov. Click on the Construction Projects link in the lower right corner of the home page.

Please pass this information on to other interested parties (tenants, business owners, etc.) at your location. Should you have any questions regarding this project please contact Idaho Falls City Engineer, Kent Fugal at (208) 612-8250.

Sincerely,

Kent J. Fugal, P.E., PTOE
City Engineer
